

Upgrades to Ventureland Playground Continue

It's the time of year when we can make some changes or upgrades to the Ventureland Playground in the Parksville Community Park, when there will be less impact on playground users.

During the week of October 3, staff will remove the aging platform climber behind the ZipKrooze, one of the older, high maintenance pieces in the playground and now more than twenty years old. This removal will permit completion of the sidewalk around the perimeter of the playground and allow for a third bay to be added to the ZipKrooze.

Towards the end this year or early 2023, rubber surfacing will be installed in the tot area near the splash park. In July we announced funding of \$300,000 from Pacific Economic Development Agency of Canada and along with the City's contribution of \$100,000 we can continue to upgrade the playground.
