

## Woodland Park to Benefit from BC Hydro Funding

The City was awarded a BC Hydro Community ReGreening Program grant of \$2,500 to be matched by the City and which will benefit Woodland Park at 16 Woodland Drive.

In 2021, we engaged with the neighbours near Woodland Park to conduct a survey to help determine a vision and priorities for the park. In the survey, residents indicated a desire to see the addition of trees to the park. Because thirteen dead and dying Western Red Cedars were removed from the park a few years ago, this funding will be used in 2022 to enhance this neighbourhood park.

Our operations crew has started to layout and dig the holes for planting of the trees and work will continue into the week of December 12. The trees chosen are a mixture of native trees, trees with fall colour, flowering trees, and trees with colour through the season.
