

Community Groups Support Parksville Wetlands

On Friday, October 27, the City hosted forty volunteers from the Arrowsmith Naturalists, Mid Vancouver Island Habitat Enhancement Society, Parksville Broombusters, Vancouver Island University, and Mount Arrowsmith Biosphere Region Research Institute whose members enthusiastically planted five hundred native plants in the Parksville Wetlands, making this event a tremendous success.

The City of Parksville is grateful and fortunate to benefit from the efforts of so many committed community members who support habitat protection and enhancement initiatives. The Parksville Wetlands is on a long journey to restore habitat and biodiversity and we hope the community will continue to support future volunteer opportunities with the City.
