

Outdoor Gym Equipment in Parksville Community Park

The equipment in the outdoor gym in the Parksville Community Park is becoming obsolete, reaching the end of its service life. For this reason, three pieces of equipment are being removed - the leg press machine, recumbent bike and the elliptical trainer. Despite being repaired many times over the years, this equipment is no longer in usable condition.

In 2013, the Parksville Lions Club raised a significant portion of the total cost of the equipment which added nine pieces of special outdoor equipment to create the green gym. The elliptical trainer was installed in 2018, and the leg press and recumbent bike were part of the original installation.

Minor maintenance work will be carried out on the remaining equipment to help extend its functionality. The City is currently evaluating options for the future of the outdoor green gym and will provide updates as more information becomes available.
