

Removal of a Fir Tree in Community Park

On Wednesday, April 13, a fir tree (*pseudotsuga menziesii*) located behind the picnic shelter area in the Community Park will be removed due to extensive decay.

A report by a certified arborist was provided to the City and because of the seriousness of the decay, a decision has been made to remove the tree as soon as possible.

An assessment of the trees in this area will be conducted over the next few months.
