

Construction Advisory - Orange Bridge Repair

PARKSVILLE, BC: Motorists are advised that construction will soon begin on the Orange Bridge over the Englishman River. The work will begin on Tuesday, October 11, following the Thanksgiving weekend and is expected to take about three weeks. During this time, the bridge will be open to alternate, one-way traffic and delays are expected.

This Ministry of Transportation and Infrastructure project will be supervised by Emcon Services and will involve resurfacing and repairs to the bridge. It is anticipated that work on the bridge will be completed by November 4 however; weather or unforeseen conditions may affect the overall schedule.

Because we anticipate significant vehicle line-up, both east and west of the bridge, we encourage motorists to avoid that area and use alternate routes whenever possible. Motorists should expect delays and plan extra time for travel while construction is underway.

Questions regarding this project should be directed to:

Nasch Aguiar, Bridge Manager, Emcon Services
