

City Park Benefits From TD Tree Day

TD Tree Day was held Saturday September 24 in Parksville at Springwood Park. Across Canada, through the TD Friends of the Environment, 28,000 trees were planted at more than 80 locations.

A fantastic group of local TD employees, family and friends, with the support of Tree Canada and assistance from the City of Parksville arborists, planted 140 trees during the day at Springwood Park. Once established, these trees will provide wildlife habitat, noise buffering and improve the aesthetics of the park. The City wishes to thank all of those involved in making Parksville a greener place.
