

Railway Crossing Repairs - Highway 4A and Highway 19A

Starting Monday, August 27, the City of Parksville will repair the two Highway 4A (Alberni Highway) railway crossings located near the old train station. The repairs will include some track tie replacements on the south crossing, as well as the installation of track seals on both crossings. The new track seal system will require paving work, which will improve the road grade and reduce the bumps for vehicles crossing the tracks.

City work crews will also complete additional repairs at the "Craig's Crossing" railway crossing located on Highway 19A beginning Tuesday, September 4. These repairs will include a replacement of the existing rubber matting and minor paving work.

The projected completion date for both repairs is September 7. While all attempts will be made to complete this work on schedule, situations such as inclement weather may arise that could delay completion. Although crews will do their best to maintain traffic flow, delays should be expected due to temporary lane closures.
