

Community Park Playground Equipment

Over the next few weeks, some of the playground equipment in the Community Park's Lions Ventureland Playground will be replaced. The play equipment is being removed because of the age of the equipment, cost to maintain in working condition or because it no longer meets standards for playgrounds.

The carousel, twin seesaws, sand diggers, geodesic dome and the toddler blue and yellow square play structure will be permanently removed. The helicopter climbing structure has been removed for repairs and will be replaced when complete.

The new equipment includes new seesaws, two new diggers (one wheelchair accessible) as well as this equipment shown here:

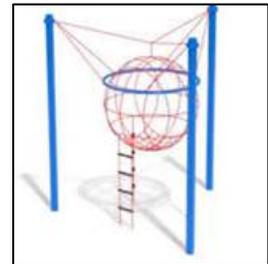

Urban Design Spinner

Little Shippy

Wasp Nest Climber

This project is funded jointly by the City of Parksville and the Parksville Lions Club. Parksville Lions Club members volunteer about 2,000 hours a year at the Ventureland Playground and have successfully raised funds to help make this project possible as well as volunteering many more hours to assist with the installation.
