

Watermain Construction at 180 Jensen Avenue East

Over the next month, construction will take place on the west property line of 180 Jensen Avenue East, property owned by Berwick Retirement Communities. Scheduled to begin July 25, the works will involve the relocation of a large watermain to facilitate service connections for the proposed development at 180 Jensen Avenue East.

The City was presented with a traffic management plan which includes closure of the pedestrian trail between the Berwick site and the main parking lot for the Parksville Community and Conference Centre. At times during construction, it will be necessary to temporarily divert pedestrian traffic along Stanford Avenue and Craig Street.

During the project, portions of the Parksville Community and Conference Centre parking lot as well as the main entrance at McCarter Street will be closed to the public. During closures, trails will be fenced and signed and traffic controllers will be on site at the McCarter and Jensen intersection when necessary.
