New Website for Parksville Fire Department

The Parksville Fire Department recently launched a new website which will provide residents of the Parksville Fire Protection Area with up-to-date news and information about the department.

Parksvillefirerescue.ca is mobile friendly, has a new modern look and an easy to navigate menu. The new website includes much more info including latest department news and information, recruitment, fire and life safety tips, links to the department's social media sites, photo gallery and department history. As well, the new site features a members' only section which will be used by the department's firefighters for training and to facilitate internal communication.

"The Parksville Fire Department is pleased to launch this new site to be able to share news with our community," said Fire Chief Marc Norris. "We hope residents will take a look around the site and pass along any comments."

New features and additional content will be added to parksvillefirerescue.ca over the coming months. Anyone interested in the Parksville Fire Department's paid-on-call firefighting opportunities should check out the new site.
