

## Corfield Street Traffic Disruptions

We have been advised by BC Housing that over the next two months, the modular building units for the supporting housing project will be moved onto the site at 222 Corfield Street South. A total of four building units will be delivered to the site about two weeks apart, weather dependent.

The first modular building unit will arrive later this week and delivery will minimally affect traffic in the 200 block of Corfield Street South.

Because of the configuration of the site and the nature of the building construction, there will be traffic delays for between one and three days for subsequent phases. When lane and road closures are required for delivery, traffic will be detoured in the 200 block Corfield Street, from Jensen Avenue East to Stanford Avenue. During these detours, access will be provided for local residents only. For pedestrian safety, the southeast sidewalk will be closed; however, the west sidewalk will be open to allow pedestrian/foot traffic.

Please refer to the City's website and social media feeds for up-to-date information.
