

Northwest Bay Road Closure Update

The twin corrugated steel pipe culverts at Craig Creek on Northwest Bay Road just west of Terrien Road at the City of Parksville's boundary are undergoing replacement. To facilitate this work, Northwest Bay Road has been closed to all traffic.

We have been informed by the contractor, Island West Coast Excavation Limited that Northwest Bay Road will open to vehicles on Thursday, August 22; a specific timeframe has not yet been determined.

Once the road reopens for traffic and when the contractor is on site during the day, there will be single lane alternating traffic on Northwest Bay Road until mid September. Please expect delays during this period. This section of Northwest Bay Road will not be paved until mid September. Drivers should be aware of conditions and follow the instructions of traffic control personnel.

For more information please contact the engineering department at 250 951-2484 or engineering@parksville.ca.
