

City Works at Corfield and Butler

On Tuesday, December 1, the City will be working at Corfield Street and Butler Avenue to install an underground waterline being done for future construction purposes. During the construction on December 1, delivery of water for homes in the area will not be affected.

On December 1, Butler Avenue will be closed heading east to Hamilton Avenue and northbound traffic on Corfield Street. Vehicles will be detoured along Hamilton Avenue or single-lane alternating traffic on Corfield. Alternating route would be through Craig Street. Local resident vehicles will be accommodated while construction is underway. Vehicle traffic, as well as pedestrians, will be directed by traffic control personnel.

Similar traffic patterns will occur on Monday, December 7 and Tuesday, December 8 and possibly one or two days during the week of December 14 for final tie-in. We will advise any further disruptions closer to when the work will be performed.
