

Marks Park Closed to Public

As a result of a fire in Marks Park early this morning, the park is now closed to allow our staff to conduct a hazard assessment; we will advise when the park reopens to the public. Signage has been posted at entries to the park advising the public that the park is closed.

The fire was relatively extensive, and our crews, with heavy equipment moving in and out, will now be working in the park to cleanup fire debris and assess the affected areas. Because of the fire, some trees in the park are affected and with the already compromised condition of some cedar trees, hazard assessment is necessary.

A significant windstorm is expected over the next few days, another reason the park will be closed for the public's safety.
