

Marks Nature Park Remains Closed to Public

As a result of a fire in Marks Nature Park on November 26, the park will remain closed to the public for some time yet. Signage has been posted at entrances to the park, advising it is closed for the public's safety and we will advise when the park is safe to reopen.

Following the fire, City staff completed a hazard assessment of the affected trees, already in a compromised condition. More than twenty trees which are high risk, will require mitigative measures before the park is considered safe. Given the specialized nature of the tree work and available resources, the work will not be completed until early in the new year.
