

New Swing for Lions Ventureland Playground

Work will begin on Wednesday, December 16 with City crews installing a new Expression Swing Universal in the Parksville Community Park adjacent to the existing Expression Swing. The new swing should be operational by December 24 and until then, the existing swing will be out-of-service.

The new Expression Swing Universal features the same adult seat as the original swing and includes an adaptive swing seat for children of all abilities, ages 5-12. The swing positions adult and child face-to-face and eye-to-eye to encourage an emotional bond during play and the adaptive seat provides an inclusive form of swinging play for children who require additional support.

With the installation of the new swing, the framework for the wheelchair swing will be removed. The wheelchair swing was removed some time ago due to regular vandalism making which made it impossible to maintain and unfortunately, relocation of the wheelchair swing is not an option.
