Changes to Parking at the Parksville Community Centre

The COVID immunization clinic operated by the Vancouver Island Health Authority will be in the Parksville Community Centre from March 15 through September. Island Health expects the vaccination clinic will be operational twelve hours a day, seven days a week providing vaccinations to Oceanside resident.

Designated parking at the Parksville Community Centre has been changed to accommodate public use while attending the clinic. Additional accessible parking has been added to the east side of the Parksville Community Centre building and parking for Island Health and the Parksville Civic and Technology Centre staff has been designated.

Due to the expected high volume of vehicles and pedestrians using the Parksville Community Centre, no other public parking can be accommodated in this area while the clinic is active.

1. Scooter and bicycle parking
2. PCTC staff parking
3. Island Health staff parking
4. Vaccination clinic parking
5. Accessible parking

In response to the provincial state of emergency, the City of Parksville is pleased to be able to accommodate Island Health's vaccination clinic in the Parksville Community Centre. Questions about vaccinations should be directed to Island Health.
