

Support for mild to moderate symptoms of:

Heat-Related Illness & Wildfire Smoke Inhalation

Community Virtual Care supports vulnerable patients **experiencing mild to moderate symptoms of heat-related illness or wildfire smoke inhalation.**

The program is suitable for immunocompromised clients or those diagnosed with a chronic disease. Clients who live in Assisted Living or Independent Living sites are welcome.

The program is delivered by Registered Nurses, who are available 08:00-20:00, 7 days a week.

Nurses assess clients over the phone at least twice a day to monitor symptoms, connect clients with other services and ensure they seek urgent medical care as required.

Referrals

Self referrals can be made by calling the Community Health Services office in your area:

- **South Island:** (250) 388-2273
- **Centre Island:** (250) 739-5749
