<b>May 23, 2010 2:04 PM</b>	Beautify the downtown core. Craig Street has so much potential. Provide incentives for business owners to upgrade storefronts, hang baskets of flowers. Move businesses like the pawn shop, laundrymat, dollar store off Craig Street and encourage more unique gift stores, bistro, outside patio dining etc. Parksville could also use a small theatre, lounge, and an affordable pub/restaurant on the beachfront. Again, look to Qualicum for inspiration. There is so much potential to beautify Parksville. We do not need box stores or high rise apartments. This is known as a beach town let us keep that in mind when developing. I think that the reason people are upset with the Beach Club is because it is not keeping with the west coast style. It should never have been allowed to be built so high. Qualicum will never have high rises on their beach. The beach belongs to everyone! Be selective of whom we allow to develop here. Do not "pave paradise and put up a parking lot!" A bike path connecting Parksville and Qualicum would be greatly utilized.	downtown enhancement	development	biking

<b>May 28, 2010 6:48 PM</b>	Immediately addressing the need to invest in protecting Parksville's most critical natural areas for wildlife habitat and access to nature. Securing these areas would have only a limited outright cost, but would provide vast benefits to the community. Growing up in Parksville, our rich natural environment with its diversity and abundance of birdlife has been central to quality of life. I do not want to see this lost. We must act to change what is in conflict with conservation in Parksville. Our current zoning and insufficient allocation of resources for preservation of natural habitat will not preserve species and ecosystems in our community. We need to do something different. We need to invest in protecting our forests and wetlands. Parksville is located within a region of national significance for the diversity of ecosystems it contains, but only some of these ecosystems have been protected. We need to protect our wetlands and more of our upland forest to maintain Parksville's natural environment, our species and ecosystems.	green space	forests

May 27, 2010 7:51 AM	I read a parksville tourist guide recently, and in it was listed at least two laundromats and a dollar store. In short, we need better shops, perhaps some for younger people as it can be inconvenient to drive to nanaimo all the time, and the one youth trendy clothes shop, "disco lemonade" closed down. I believe a movie theatre, even if small, would be very popular here. I also think that wembley mall could be improved. It has potential, right now though it feels dark and boxey, and again there are limited store choices. Food for thought.	stores	movie theatre	Wembley mall
