

Hello,

The Memorial Avenue Streetscape and Utility Upgrades Project is underway and our first public engagement events are planned to take place in June. The project team has been working hard to engage the local community, plan inclusive public consultation activities, and begin the technical work required to make this project a success.

Our team has been generously supported by our community in gathering historical documents about Memorial Avenue, the Parksville residents who served in World War I, and the trees planted in memoriam of those who did not return to us. We have also completed a full topographic survey of Memorial Avenue and a detailed professional assessment of each of the memorial trees.

We are now getting ready to begin discussions with stakeholders and the public about important elements of this project including parking, business/residence accesses, pedestrian and cyclist accessibility, and how to integrate the unique memorial trees into this upgraded downtown streetscape. Once the dates have been finalized for the upcoming events, we will send you an invitation. We would be grateful for your participation as a stakeholder in the future of this special street.

Thank you for your interest in this project. We look forward to further communications and will continue to update you as we proceed through each phase of this project.

Thanks,

Michael Lonsdale, ASCT, LEED GA
