

Hello,

We're proud to report that we've received a lot of positive and constructive feedback about the Memorial Avenue Streetscape and Utility Upgrades Project, and we hope we can keep the conversation going this **Saturday, June 22, at 10:30 am OR 12:30 pm at the McMillan Arts Centre** for our *Memories on Memorial Walkshops*. The weather forecast is good, so bring your family for information about the trees, the history of Memorial Avenue, and the work that needs to be done. This is a wonderful opportunity for the community to help shape the vision for Memorial Avenue's future.

At the walkshops, our project team will guide you through activities to help us see what you envision for Memorial Ave – would you like to see more parking? More green space? More traffic flow? We want to know what your priorities are. We'll also share details about each of the trees, their health, how they can be shared with future generations, and we hope you will share your memories of these trees and this street with us.

The **McMillan Arts Centre** will serve as the start and end place for the walking tour. This historic building is pictured above as the Parksville School with Parksville's cenotaph in front at the intersection of McMillan Street and Memorial Avenue. If you look closely, you can see two of the elms under which we will gather on Saturday. More photographs and information like this will be shared at the walkshops and is on our project website, MemorialAve.ca.

We will continue to update you as we proceed through each phase of this project; we appreciate your continued support and hope to see you at one of the walkshops on June 22.

Thanks,

Michael Lonsdale, ASCT, LEED GA
