

Hello,

The Memorial Avenue Streetscape and Utility Upgrades Project team is excited to report that the survey results are in! The survey ran from June 11 to July 3 and garnered over 80 responses. Results from the survey are currently being reviewed and integrated by design staff and will be included in a future “What We Heard” report. The project team is excited to gain a better understanding of the priorities, concerns, values, and visions of all those who participated.

With the survey results in mind, the project team is working towards creating some concept options for the streetscape. These concepts will help us explore some of the opportunities and restrictions that are present along Memorial Avenue. At our **upcoming workshops on July 10**, we will explore potential streetscape configurations with participants. We will also discuss various details like lighting, paving materials, landscaping, parking, street furniture, and additional memorialization.

Pictured above is some Memorial Avenue construction in the 1940's – can you spot the differences and similarities to today's photo, taken from the Alberni Highway looking westward?

We will continue to update you as we proceed through each phase of this project; we appreciate your continued support and hope to see you at one of the workshops on July 10.

Thanks,

**Michael Lonsdale, ASCT, LEED GA**
