

Hello,

We are excited to announce the streetscape design for Memorial Avenue and that the City of Parksville will be moving forward. This design incorporates the values and vision that both Parksville residents and property owners on Memorial Avenue have let us know are important elements to the project.

Maintaining and enhancing the health of the memorial trees remains a priority for the City. Additional space is being allocated to the memorial trees, which will help these hundred-year-old trees thrive for years to come.

Memorial Avenue truly is the roots of our community, and the heart of this design is an exciting new 9000 square foot public square. A key component of the City's downtown revitalization strategies, this space will be utilized year-round and represents a dynamic venue for community groups, residents, visitors, and businesses to celebrate and experience downtown Parksville. We hope to make this public square a space visitors want to experience and a place everyone will remember.

Pedestrian connectivity will be an important element of the streetscape of Memorial Avenue and vehicular access will be maintained along with street parking. For more information about the streetscape design concept, please visit our website, MemorialAve.ca or feel free to contact the project team with any questions you may have.

Thank you for your continued support and interest in this project. We will continue to provide updates as we proceed through each phase of this project, and we look forward to starting detailed design work for this exciting space.

Thanks,

Michael Lonsdale, ASCT, LEED GA
