Key Messages

- An Order under the Water Sustainability Act was received on August 5, 2026, authorizing a flow reduction of 0.80 m^3/s at hydrometric gauge 08HB002, for the remainder of the flow release period, ending October 31, 2026. The order was issued to support water conservation at the Arrowsmith Reservoir.
- The WSC Hydrometric Gauge 08HB002 was last calibrated on October 9. The data was corrected up to the last calibration. Operators maintain river levels based on available WSC data, and adjustments to flow are implemented once calibration and data correction are completed.
