

## Gas line upgrades by Fortis BC in Parksville

Updated May 17, 2024

### Project details

To improve reliability and meet the growing energy needs of our customers in Parksville and the Nanoose Bay area, we will be upgrading a gas line along a 2,000-metre section of the northbound shoulder and curb lane of Island Highway East from Huntley Road to Orange Bridge.

The upgrades will help to increase capacity of the local gas system for continued reliable service to customers while meeting the needs of the growing population in the region.

While we expect minimal disruptions to the public, drivers in the area may experience some delays, and we ask that they carefully follow the instructions of traffic control and construction signage.

We appreciate the public's patience as our crews work to complete the upgrades safely and as quickly as possible.

### Anticipated dates

May 6 to the end of July 2024
