

Hello,

After the design workshops yesterday, the Memorial Avenue Streetscape and Utility Upgrades project team are busy reviewing the great ideas and insights we heard. Through these workshops, the project team learned more about the community's vision and values for Memorial Avenue. Thank you to all who made it out to brainstorm configurations and design details with us!

Throughout the project, the team has been working with the community to integrate their ideas and preferences into design concepts which are currently in progress. Once we have completed conceptual drawings we plan to present them to the community for additional feedback. Factors like technical considerations, third-party utility companies, and tree health will combine with the community's visions for the space to help us create a design which we hope will successfully address all of the opportunities and challenges present on Memorial Avenue. Please keep an eye on the project website MemorialAve.ca for more information about future engagement opportunities and project updates.

Thank you for your continued support. We look forward to exploring the great ideas the community have presented and will continue to update you as we proceed through each phase of this project.

Thanks,

Michael Lonsdale, ASCT, LEED GA
